

New Asthma Clinical Research Study

*Working together to
find better medical
treatments for
asthma.*

Patients with asthma that take inhaled steroids may be eligible to participate in a study at the NIH Clinical Center. The purpose of this study is to determine if a widely used medicine for diabetes can improve asthma.

- All study-related tests and medications will be provided without cost
- Compensation will be provided

You may be eligible to participate if:

- You have been diagnosed with asthma
- You are 18-75 years of age

You may not participate if:

- You are pregnant
- You have chronic obstructive pulmonary disease (COPD), chronic bronchitis, pulmonary fibrosis, or sarcoidosis
